2RZ/3RZ Street Header Kit - Part #'s 1041048 & 1041054

Your LC Engineering Street Performer Header Kit is supplied with the necessary gaskets and hardware for installation. This header kit replaces the stock exhaust manifold and connector tube. It is designed to bolt directly to your factory catalytic converter.

This Header Kit utilizes all factory emission and oxygen sensor equipment in stock locations and performs to OEM requirements.

Follow all factory service manual recommendations for removal of stock exhaust manifold. Reverse instructions for installation of LC Header Kit.

Exhaust Studs: Torque exhaust studs to 33ft-lbs. We also offer new header mounting studs if needed (part #1045030).

NOTE: LC Engineering does not recommend the use of header wraps.
